

**MaaS360** from IBM  
extended products

# MDM...the basics

## Mobile Device Management

You can Manage smartphones, tablets & laptops featuring iOS, Android, Windows 10 Mobile, Windows 10 and macOS. Gain complete visibility of devices, security & network. Enforce compliance with real-time & automated actions.

## Mobile Application Management

Deploy custom enterprise app catalogues. Blacklist, whitelist & require apps. Administer app volume purchase programs.

## Mobile Expense Management

Monitor mobile data usage with real-time alerts. Set policies to restrict or limit data & voice roaming. Review integrated reporting & analytics.

+

+

+

# Security made easy

## Secure Mobile Mail

Contain emails, attachments & chat to prevent data leakage. Enforce authentication, copy/paste & forwarding restrictions. FIPS 140-2 compliant, AES-256 bit encryption for data at rest.

## Secure Mobile Browser

A feature-rich web browser for secure access to intranet sites. Define URL filters & security policies based on categories. Block known malicious websites.

## Gateway for Browser

Enable MaaS360 Secure Mobile Browser to access enterprise intranet sites, web apps & network resources. Access seamlessly & securely without needing a VPN session on mobile device.

## Mobile Application Security

Contain enterprise apps with a simple app wrapper or SDK. Enforce authentication & copy/paste restrictions. Prevent access from compromised devices.

## Mobile Content Management

Contain documents & files to prevent data leakage. Enforce authentication, copy/paste & view-only restrictions. Access distributed content/repositories SharePoint, Box, Google Drive & OneDrive.

+

+

+

Extras...

### Gateway for Apps

Add per app VPN to Mobile Application Security to integrate behind-the-firewall data in private apps. Incorporate enterprise data without a device VPN session.

### Container App

A separated mobile workspace for iOS, Android, and Windows. Send contained Messages to users from the MaaS360 portal. Access Support, Expenses and Settings via in-container apps.

# Extras...

## Mobile Identity Management

Dynamically assess risk associated with mobile app access using contextual information about the device. Adaptive authentication for graded trust to improve security posture while providing the least obtrusive user experience.

+

+

+

## Secure Mobile Chat

Enhance on-the-go collaboration and productivity. Contain all chat mobile conversations and data. Establish quick connections via corporate directory lookup.
