£2.60 per user

Key features and benefits.

Employee control

Provide employees with the ability to register, enrol, and manage their devices of choice and install corporate applications from the self-service Company Portal.

Office mobile apps

Enable your employees to access the Office mobile apps they know and love while applying policies that can help prevent company data leakage.

Data Protection

Secure all corporate data, including Exchange email, Outlook email, and OneDrive for Business documents. Control setting from the cloud based portal

No infrastructure required

Eliminate the need to plan, purchase, and maintain hardware and infrastructure. Intune's cloud based service and subscription model can save costs.

Enterprise integration

Extend your existing infrastructure through integration with Intune to provide a consistent management experience across devices, inside and out of the office.

24/7 – 365 support

Get answers to your questions with Microsoft support available online and by phone worldwide, 24/7, every day of the year.

What is Windows Intune?

What is Windows Intune?

Windows Intune provides you with Mobile Device Management, Mobile Application Management and PC Management capabilities from a cloud based application.

Makes application admin simple

The self-serve portal allows employees to remotely download apps and updates that you have selected, eliminating the need for complicated software roll outs, without you losing control of what they are doing.

Supports BYOD

Employee owned devices can be managed and protected in exactly the same way as your business devices.
